

## **Crossing borders: a project**

### Creating a visiting program for American teenagers

Imagine you have been chosen by a committee to create a visiting program to Germany (**a trip throughout the complete country**) for a group of 15 American students at the age of 16 – 19. These students have never been to Germany before and are more likely to have some prejudices concerning Germany/the Germans.

You are asked to create a 10-day program for this group, which gives them a small insight into German culture and lifestyle. This is part of a contest and the winners of this contest will be allowed to travel with the group and are invited to visit them back.

When creating the program (**PowerPoint**), include the following aspects:

- sights
- culture
- food
- other interesting facts/things to see/do

Send it to your teacher (via email) until **March, 30 (it will be graded :)**

*Have fun and stay safe!*
