

Tasks 7b - p. 91 Step 5 (project)

Do it on your own.

- Pick one of the five regions on the map for this task. Don't forget to write down the name of the region.
- Do as the textbook says.
- Same as b, but now for your region (NRW or Hagen)

Write a short paragraph in which you compare the two regions (in the UK & yours) according to their climate.

Create a poster in the end to present your information. Pictures and charts or diagrams can be helpful here. It's okay to draw things on paper. You don't need to use a printer. Or you can also do it on the computer. You decide which works best for you.

Please note down the sources which you used for this project. Write down the exact URL of the website (e.g. <https://www.metoffice.gov.uk/research/climate/maps-and-data/uk-temperature-rainfall-and-sunshine-time-series>) or the name of the book you used. Also add the date you looked it up there.

Here's a draft of what your poster can look like:

Sources can also go on the back of the page or the next page
